Upwork Freelancer

FRONT-END WEB DEVELOPER

- I have experience in implementing UI/UX solutions into web applications for a variety of clients.
- Have experience designing and maintaining custom-made websites using tools such as Illustrator and Photoshop for visual design, as well as HTML, CSS, and JavaScript for coding.
- I have created website designs from scratch and have also updated website content and design over time, while troubleshooting technical issues as they arise.
- Incorporating SEO into static web applications.
